SECURITY STAFF

LOGISTICS OFFICE

DISCUSSION

At the time the present organization of the Logistics Office was approved (March 1953), the Security element was established as a part of the Administrative Staff. The Security Officer has, in actual practice, reported direct to the Chief of Logistics on all matters of a security nature requiring his attention. Security functions have been successfully accomplished through the facility of direct communication between the Security Officer and the Chief of Logistics, and between the Security Officer and representatives of Logistics Office components. The proposal for establishing the Security Staff as a separate Staff reporting directly to the Chief of Logistics is an organizational change which has proven successful in actual practice.

JUSTIFICATION

1. An examination of work performed in the Security Staff reveals that there is insufficient clerical assistance to perform necessary typing and records maintenance activities. Even with two employees engaged full time in clerical work, it will be difficult to maintain the work in a current status and to establish records in a condition most conducive to effective operation.
2. The attached estimated workload data for each major activity of the Security Staff is furnished for justification of staffing proposed.
